Shaping the future transforming the market

Infolab 8087, through the concept of Open Innovation, promotes **collaboration between national and international startups**, positioning us at the forefront of developing innovative and customized solutions for the Oil & Gas, Steel & Mining and Energy segments.

By **developing strategic partnerships**, we deliver the best innovations to our clients. We turn complex challenges into concrete opportunities for **optimizing results, growth, and efficiency**.

Digital twins, AI, WMS, RFID, and drones are some of the technologies we employ in solutions such as passenger management, leak detection, asset preservation, due diligence, and security and monitoring.

Check out our differentials:

- Sales force
- Product alignment with market demands
- Business mentoring
- Investor acquisition and funding resources
- Legal support, marketing and public relations advisory
